SANDA D5.3: JHR reactivity sensitivities to nuclear cross-sections

CEA Cadarache

05/02/2024

G. TRUCHET

Updated version of deliverable D5.3

❑ Calculation methodology:

  ❑ The TRIPOLI4 Monte Carlo IFP calculation is conducted straightforwardly, including all isotopes without any underlying assumptions. A reference has already been provided.

❑ Additional details to be added:

  ❑ References to pertinent publications, with comments.

  ❑ 26-group structure

  ❑ Comments on the computed uncertainties (Tables 3 and 4)
